*Please note*, the Equipment Identification Number should be marked on the equipment's serial plate, or close to it. This can be done by means of a non-removable sticker.

You will appreciate it is imperative that all units sold in the UK for MOT installations conform exactly to the specification approved by our Inspecting Engineer. To this end, we will require you to confirm Conformity of Production on an annual basis and will be writing to you in due course concerning this. Any modifications should be notified to us.

Failure to ensure these requirements are met could result in the equipment being removed from the 'Current' Equipment list maintained by the DVSA.

Yours sincerely
